SR178/Fairfax Road Interchange Project Eastbound traffic to move onto new roadway

The Thomas Roads Improvement Program announces the following traffic alert for motorists traveling eastbound on State Route (SR) 178 through the Fairfax Road Interchange project area.

Security Paving Company (SPC), the project's contractor, plans to move eastbound traffic from the existing highway onto the newly completed ramps on Friday, May 30, 2008. Following the change, eastbound motorists will not have access to Fairfax Road from SR 178 for approximately one month.

Westbound traffic will continue to use the existing highway until late June, at which time SPC plans to shift all traffic onto the ramps. Access to Fairfax Road south of SR 178 will open to traffic at that time. Access to Fairfax Road north of SR 178 will close at the end of June and remain closed for approximately nine months. Transferring traffic to the ramps allows SR 178 traffic to continue unimpeded while work continues on the project.

Stay alert and follow traffic and detour signs while traveling through the area.

For additional information, contact Janet Wheeler at (661) 326-3491.
