Traffic Advisory

Long-term Lane Closures on Coffee Road

Security Paving Company, the contractor for Westside Parkway Phase 2, plans to close the northbound and southbound inside lanes on a section of Coffee Road between Truxtun Avenue and Brimhall Road on Wednesday, September 1, 2010. Lane closures are expected to be in place at 6 a.m. for the northbound lane and at 9 a.m. for the southbound lane.

The lane closures are needed to construct the center support columns for the Westside Parkway Bridge that will cross over Coffee Road. After these columns are constructed, this area is needed to support the overhead forming for the bridge superstructure. Motorists should expect these lanes to be closed for at least six months. Two lanes in each direction are expected to remain open to traffic while this construction is underway.

Motorists are advised that the lane reductions may cause delays to their daily commutes and to avoid the area and use an alternate route if possible. If traveling through the area is unavoidable, please allow for additional travel time.

The Thomas Roads Improvement Program will continue to update the public to changing traffic conditions, and apologizes for any inconvenience this work causes the traveling public.
